

► The Voter Registration Update

The Voter Registration Update is a process in which the Provisional Voters' List containing the names and personal data of eligible registered voters is made available to individuals and families to check that their information is correctly entered. The information on the Provisional Voters' List comes from the IHEC voter registration database 2008 which is drawn from data taken from the Ministry of Health, Ministry of Displacement and Migration, Ministry of Trade and three voter registration update exercises in 2008 and 2009.
