## **PROCEDURAL UPDATE FOR COLLECTION OF SIGNATURES FOR REFERENDA FOR THE FORMATION OF REGIONS**

02 December 2008

### **1. Temporary Use of Form 111 in absence of Form 311**

In case that Form 311 is not available for the start of a signature collection process, Form 111 will be used until Form 311 is available.

In this case, an additional special signature collection stamp will be provided to the Sub-Centre, to stamp a heading on the top of Form 111, to indicate that the form is an application for inclusion on the signature list (and not used as a voter registration form). This stamp will also include a field for voter number.

In completing Form 111, the Data Clerk will:

- Stamp the heading of the form with the special stamp
- Write the voter number of the applicant in the designated boxes of the stamped area
- Complete the upper section of Form 111 for the applicant's personal data.
- Put a large cross (X) through the five registration activities of the form (between the upper section and signature section). This is not relevant and should not be completed.
- Complete the signature area at the bottom of the form in the same way as Form 311.

All other procedures relating to the form will follow procedures as for Form 311 (such as issuing the final copy to the applicant, and packing procedures).

Form 311 will replace the temporary use of Form 111 as soon as Form 311 is available and provided to the Sub-Center by the GEO. The Sub-Center will pack all unused Forms 111 and the

additional Signature Collection Stamp for transfer to the GEO according to GEO material transfer instructions. After removal of the unused Forms 111 and the additional Signature Collection Stamp, only Form 311 will be provided to applicants.

## **2. Documentation Requirements**
