

## IMPACT OF CRISIS

As of 14 January 2015, the number of people reported to be displaced in Iraq stood at 2.1 Million according to "IOM Displacement Tracking Matrix". Of this number, approximately 576,846- (27.5%)- are sheltered in Dahuk Governorate with a significant percentage of them housed within hosting community, in 17 IDP camps, in unfinished buildings and informal settlements like schools.

Five governorates are affected by the ongoing instability in the country, these are: Salah Adin, Diyala, Kirkuk, Anbar and Nineveh. However, the majority of IDPs in Dahok are from Nineveh and Kirkuk; their need for life-saving assistance such as health care and protection is consequently increasing.

The influx of refugees into Dahuk also continued during this reporting period; an estimated 15,028 refugees were reported to have arrived Iraq between June and December, 2014, of which 41.5% were reported to have settled in Dahuk as well. This also increased the pressure on the health system and services in the said governorate. health system and services in the governorate.
